

THE POSITION

We are looking for an **Electrical Technician** to embark on a rewarding journey with us at Mpac, where your passion for quality and teamwork will thrive.

POSITION:

Electrical
Technician

DEPARTMENT:

Operations

TYPE:

Full time/Perm

LOCATION:

Mpac Lambert,
Station Estate,
Station Road,
Tadcaster, LS24 9

TEAM MISSION

Our mission is to create automation ecosystems that enhance the manufacturing world to adapt and grow, effectively and efficiently.

We pride ourselves on our exceptional service, and our **INTEGRITY & DRIVE** make us stand out from the crowd. Our **COLLABORATIVE** approach fosters an environment of growth & **INNOVATION**, built upon a solid foundation of industry-leading standards, alongside a diverse team & **EXPERTISE**.

As an Electrical Technician you will;

- Be a key player in the electrical build, wiring & electrical testing, special purpose automation.
- You will work within our Productions team however, this role will gain exposure to working closely with the manufacturing teams, & the wider Ops team.

CORE FUNCTIONS & OBLIGATIONS

- Wire machines, sub-assemblies, and control panels to Mpac schematics and documentation.
- Work with Senior Electrical Technicians, Supervisors, Managers and wider project teams to highlight and resolve issues to deliver projects effectively and efficiently.
- Ensure time is booked accurately and rework/non-value time is logged appropriately.
- Contribute to continuous improvement efforts.
- Participate in machine site installations and set-up in the UK or abroad.
- Contribute to apprentice development and support.
- Always demonstrate respect, integrity, trust, and excellence in interactions with all colleagues, customers and suppliers in line with Mpac's internal customer ethos.
- Flexible to, on occasion, undertake tasks that may stray from direct day-to-day responsibilities.

CORE DELIVERABLES / OUTPUTS

- Delivering electrical builds on time, on budget and to Mpac standards.
- Working in a safe manner.
- Maintaining good housekeeping.
- Be a champion for Mpac values.

WHAT ARE WE LOOKING FOR

- Proven ability to work under own supervision or as part of a multi-technical team.
- Experience of working in an electrical engineering environment.
- Experience of electrical/automation machinery & ability to fault find.
- A good understanding of low voltage systems: analogue and digital IO and other typical automation systems.
- Proficient with schematics and problem solving.
- Sound IT skills (for use of shop floor computer terminals).
- Ability to read and understand technical and electrical schematics.
- ONC / BTEC / City and Guilds in a relevant electrical/mechatronic engineering discipline.
- Sound interpersonal and communication skill.

DESIRABLES BUT NOT NESSECITIES

- Experience of installations with pneumatic/electro-pneumatic equipment.
- Understanding of EMC screening, earthing and bonding for machinery.
- Understand basic PLC programming.

WHY MPAC? [benefits]

- 25 days holiday per year plus bank holidays
- Company sick pay
- £50 per year towards Dental
- £50 per year towards Optical
- Perkbox – discounts & wellness resources and celebration hub
- Employee Assistant Programme
- 4% company pension contribution
- Pension Salary Sacrifice option
- Company social events

If the above sounds like you and you would like further information or details of the full job description please contact HR. If you wish to apply please forward a copy of your CV together with a covering letter to Lambert.Careers@mpac-group.com.
